mobiReady Test Results

Your mobiReady Score

🌐 http://fattanehameri.com
🕐 2017-01-30 14:42:12.473303

1

The tested page performed extremely poorly, scoring only 0.82. Many significant test failures were detected, these are likely to directly impact the user. The tested page weight, in terms of bytes downloaded, is very high and user experience will suffer as a result.

image crunch

How to fix it
(http://mobiforge.com/design-
development/fixit-
image-crunch)

All images should be optimized to reduce file size and the appropriate image type should be used for each image asset

1   Image would be 27% smaller after optimization

    `http://fattanehameri.com/img/microsoft.jpg`

2   Image would be 12% smaller after optimization

    `http://fattanehameri.com/img/linkedin.png`

3   Image would be 41% smaller after optimization

    `http://fattanehameri.com/img/mcps.png`

4   Image would be 45% smaller after optimization

    `http://fattanehameri.com/img/MCAD.png`

5   Image would be 66% smaller after optimization

    `http://fattanehameri.com/img/MTA.png`

6   Image would be 53% smaller after optimization

    `http://fattanehameri.com/completed/MCAD.png`

7   Image would be 53% smaller after optimization

    `http://fattanehameri.com/completed/mcps.png`

8   Image would be 49% smaller after optimization

      `http://fattanehameri.com/completed/capella.png`

9   Image would be 44% smaller after optimization

      `http://fattanehameri.com/img/fatiJon.jpg`

10   Image would be 54% smaller after optimization

      `http://fattanehameri.com/completed/MTA.png`
